FALL ATTENUATION SURFACE

The design of this unit includes overhead components that necessitate fall attenuation surfacing. As per **ASTM Standard F3101-21A**, Standard Specification for Unsupervised Public Use Outdoor Fitness Equipment, the Fall Attenuation Surface must meet **Playground ASTM Standard F1292** (Specification for Impact Attenuation of Surfacing Materials within the Use Zone of the Playground Equipment).

*This exercise utilizes an optional add-on accessory that is not intended to be left unattended with the equipment. Greenfields recommends that this accessory be made available at a nearby facility for check out by users.

Greenfields' units are designed to accommodate the majority of users age 14 and above; however, due to the nature of outdoor fitness equipment, units are "one size fits most".

In order to honor our commitment to quality and safety, Greenfields Outdoor Fitness reserves the right to make changes and revise the design specifications without notice.

Required dimensions **37'3" x 36'**

The highest point of the Mega Functional Fitness Rig is **11'-9"**

Maximum critical fall height (CFH) is defined as the distance between the designated use surface and the surface beneath it.

The finished surface level should be flush with the surrounding area's surface to avoid injury and provide easy access to the training area.
